

COW GIVES 9 QUARTS DAILY FOR 15 YEARS

U. of M. Jersey Cow Has Produced 108,968 Pounds of Milk in That Time.

Fifteen years ago an assistant in the dairy department of the University of Missouri began to keep the record of the milk and butter production of a small Jersey cow. This assistant has gone and others have come and gone, but the Jersey cow is still on the job. In the fifteen years she has produced 108,968 pounds of milk and 5,000 pounds of butter fat, or 5,833 pounds of butter.

Her best year's record was 13,322 pounds of milk and 730 pounds of butter.

During the fifteen years this cow, Grace Briggs, has given birth to 12 calves. Her last calf sold for \$300, and the average for the 12 is about \$200. About \$2400 was obtained from the sale of all the calves. Figuring the entire milk production for 15 years at eight cents a quart, the total would be \$4,358.72. The approximate cost of keeping her was \$50 a year, or a total of \$750.

The average daily production of milk for the 15 years was a little more than 9 quarts a day. During her best year she produced a little more than 18 quarts a day.

If the butter was sold instead of the milk, at the price of 35 cents a pound, the total for the butter production from Grace Briggs would be \$2,041.55.

Carnival Attracts Large Crowds.

Allmann Bros Big American Shows attracted another large crowd last evening. The Midway was crowded all evening and all the shows were well attended. Many features with the Allmann Bros Shows.

The Society Circus, a horse show that is different, attracted the largest crowd last evening. Here one can see educated horses and mules do everything but talk. The feature number on the program at the Society Circus is "Sahara" the Goodnight horse, a horse that has been trained to go to bed the same as you or I.

All the other attractions of the Allmann Bros Big American Shows were open and all were very pleasant to all who attended.

Pile-Exit.

This is another of the Penslar Remedies—an ointment for both internal and external piles.

It relieves the pain and itching almost immediately, while the astringent and antiseptic properties promote healing and absorption of the tumors.

The collapsible tube in which this remedy is put up makes it especially easy to use—there is a long nozzle for the tube, to assist in applying the ointment to the inner parts.

Penslar
Remedy

Pile-Exit

contains no opiates but is compounded of Tannic Acid, Carbolic Acid, Oil of Tar and Extract of Stramonium in the correct proportions.

It is the nearest to a universally satisfactory pile remedy that we have ever sold. It has to be good or it could not be a Penslar Remedy. Price 50 cents.

NOVEL USE FOR TELEPHONE

Surgeons Employ Instrument to Determine the Exact Location of Bullets.

War is a stimulus to science, and this is reflected very strikingly in matters pertaining to the relief of the wounded. The search for and extraction of fragments of shells is no simple matter, although surgical endeavor has been facilitated by the perfection of the X-rays. But these are insufficient. A bullet may be located speedily, but the difficulty is to ascertain its precise position by the probe and lancet. As a result of study and investigation a simple and effective method of discovery has been perfected, which may be described as telephoning for bullets. Ordinary telephonic receivers are clamped over the surgeon's head, one wire being led to a carbon plate and the second wound round the knife, probe, needle, forceps or whatever instrument is used. With this implement the search is made, and directly it comes into contact with, say, a bullet, a distinct click is heard on the telephone. If the instrument is rubbed across the surface of the buried object a rattle is observed, and by following this clue it is possible to withdraw the bullet or fragment of metal. The idea is by no means new, inasmuch as it was employed for the first time during the Boer war; but the present campaign has served to bring it to a high state of perfection.

CAT!

"How do you like my hat?"
"I like it very much. I always did like that hat."

GUIDE TO JAPAN.

Walk up five months, beginning with January, turn sharply to your right, and there is June.

June is noted for its roses and honeymoons. There are more desolated households in June, on account of outgoing brides, than at any other time. Also more households where mamma experiences a grand feeling of relief and papa hopes that now expenses can be cut down.

To enjoy June properly, take an early start. Begin to make your plans about it in March. Get rid of your moral courage, your character and your regular business. Then, grabbing all the money there is in the cash drawer, enter June with confidence and give yourself up to it with the complete serenity of houseless irresponsibility.—Life.

PERSISTENT CHANGE.

"What are your ideas of the best form of government?"
"Oh," replied the restless agitator; "it isn't a question of what kind of a government we're after. It's merely getting rid of the one at present in operation."

AWKWARD SITUATION.

"For two dollars I will foretell your future."
"Are you a genuine soothsayer?"
"I am."
"Then you ought to know that I haven't got two dollars."

NO WONDER.

"There is one class of employed men who are expected to strike."
"Who are they?"
"Baseball batters."

NO DOUBT.

"Cotton has some dire possibilities as an investment."
"Naturally; cotton is a baleful subject."

THE ONE EXCEPTION.

"You have no cross to bear," said the husband.
"Only when you are as cross as a bear," replied the wife.

ONE CENT SALE

Friday and Saturday, AUGUST 27th AND 28th

By conducting this one-cent sale we are willing to lose money on these items to attract new and old customers to our store on this occasion. Buy at the regular price any article listed below, add another cent and get two. LIMITED—only two of each kind to one person.

September American Magazine

In the September American Magazine Stanley Johnson writes the first of a series of articles entitled "Youth Leads the Way," which is to show how boys and girls, from ten to eighteen years of age, are adding untold sums to the wealth of the country. These boys and girls, under the direction of the Department of Agriculture, are taking hold of farming in various states and showing their elders how more can be got out of the land. Last fall in Ohio, alone, 1200 boys added \$20,000,000 to the wealth of the state.

In the same issue, Jerome D. Travers, present open golf champion of America and four times amateur champion of the United States, writes a wonderfully interesting article entitled, "Golf Nerve Under Fire." He tells many stories of great players who have won or lost matches in tight pinches. The total effect of the article is to cheer up the "duffer," because star players as well as poor players, are shown to have bad days. Harry B. Smith, who has written the dialogues and lyrics of one hundred and thirty musical comedies, involving between three

and four thousand songs, contributes a highly entertaining article entitled, "Some Inside Information About the Musical Play." Ida M. Tarbell writes another article in her business series entitled, "The Golden Rule in Business," in which she shows the important part that athletics play in industrial life today.

Fiction is contributed by Susan Glaspell, Phillip Curtiss, Walter Prichard Eaton, John A. Moroso, Ellis Parker Butler and David Grayson.

The two departments, "Interesting People" and "The Family's Money," are full of good reading and practical suggestions. The prize winning letters in the contest entitled, "The Thing I Am Proudest Of," and James Montgomery Flagg's amusing piece in words and pictures entitled, "A Marriage Va-

cation," complete a lively and attractive number.

Mr. and Mrs. W. H. Humphrey returned Sunday evening from a few days' visit in Kansas City. Dr. A. E. Rogers left Sunday evening for a few days on business in Tipton, Mo.

Miss Marie Hale went to Kansas City Sunday morning for a visit with Mrs. E. O. Kearns.

MACHINE&Y EXHIBITS TO HAVE THEIR INNING AT STATE FAIR THIS FALL AS NEVER BEFORE.

Machinery exhibits at the Missouri State Fair this fall are to have their inning as never before, and from September 25 to October 2 at the machinery and power buildings shown in the above cut, there will be seen the most modern and advanced ideas in agricultural and farm implements and machinery. This will appeal directly to the agriculturist and to everyone that is interested in the progression that agriculture is making all the time.
